

**fórmula**  
ENERGY

**5W-30**

energy creates energy

100% synthetic lubricant, developed to meet the needs of Ford engines (including diesel with particulate filters). Meets the FORD WSS M2C 913-D standard. This product is also recommended for vehicles where the FORD WSS-M2C 913-C and FORD WSS-M2C 913-A / B specifications are required. Promotes fuel economy.

The high stability of the lubricant film at varying temperatures and pressures, as well as the maintenance of its properties, allows for extended oil change intervals. Its low viscosity ensures good oil flowability at low temperatures, facilitating cold starts.

**Thanks to the use of cutting-edge friction modifiers, this product can achieve fuel savings of at least 1.5%, when compared to a 15W-40 reference oil.**

## MAIN FEATURES

Density at 15°C, kg/l (D1298/D4052)	0.856
Viscosity Index (D2270)	165
Kinematic viscosity at 40°C, mm <sup>2</sup> /s (D445)	71
Kinematic viscosity at 100°C, mm <sup>2</sup> /s (D445)	12
Pour Point, °C (D92)	-39
Flash Point, °C (D92)	210

## SPECIFICATIONS / APPROVALS

ACEA	A3 / B4
API	SL / CF
VW	502.00 / 505.00
MB	229.5 / 229.3
GM	LL-A / B-025
RENAULT RN	0710 / 0700

## PROPERTIES:

- Excellent lubricating film stability which maintains all its properties even under extreme pressure and temperature conditions.
- Reinforced detergent / dispersant capabilities, ensuring that engines remain perfectly clean by inhibiting the accumulation of soot.
- High fluidity at low temperatures, thus providing a protective lubricant film on all engine components immediately after starting.

## PACKAGING:

- IBC 1000 L
- Drum, 205 L
- Box, 4 x 5 L
- Box, 18 x 1 L

FPC 916 – NOV15 R&D – LUB - GPA

Help protect the environment: do not dispose of used oils by dumping them in drainage systems, waterways or on the ground. GL15003a

## ABOUT GALP:

An integrated Energy Company with worldwide recognition in sustainability initiatives and awarded the top place in this field from the Dow Jones Sustainability Indices for eight years running, GALP is proud of top high quality tested and fully approved products. From base oils to aromatics, motor oils and fuels, the meaning of being an integrated oil company means just that the full life cycle of its products goes from the exploration and production, refining and production of finished lubricants. Not a simple blender, being an integrated company means, literally, producing a product from its source to the consumer hands.
